Acta Neuropathologica was founded in 1961. Editorial Board: **I. Bertrand,** Paris, **W. Blackwood,** Sevenoaks/Kent, **L. van Bogaert,** Wilrijk, **E. Frauchiger,** Bern, **W. Haymaker,** Moffet Field, **W. Krücke,** Frankfurt/Main, **F. Lüthy,** Zürich, **W. Scholz,** München, **F. Seitelberger,** Wien. Managing Editor: **F. Seitelberger.** Berlin Göttingen Heidelberg: Springer-Verlag, Wien: Springer-Verlag.

It is a fundamental condition that submitted manuscripts have not been published and will not be simultaneously submitted or published elsewhere. By submitting a manuscript, the authors agree that the copyright for their article is transferred to the publisher if and when the article is accepted for publication. The copyright covers the exclusive rights to reproduce and distribute the article, including reprints, photographic reproductions, microform or any other reproductions of similar nature, and translations.

Photographic reproduction, microform, or any other reproduction of text, figures, or tables from this journal is prohibited without permission obtained from the publisher.

The use of general descriptive names, trade names, trade marks, etc., in this publication, even if the former are not specifically identified, is not to be interpreted as exempt from the relevant protective laws and regulations and may accordingly be used freely by anyone.

While the advice and information in this journal is believed to be true and accurate at the date of its going to press, neither the authors nor the editors nor the publisher can accept any legal responsibility for errors or omissions that may have been made. The publisher makes no warranty, express or implied, with respect to the material contained herein.

Photocopies may be made for personal or internal use beyond that permitted by Section 107 or 108 of the U.S. Copyright Law, provided a fee is paid. This fee is $0.20 per page or a minimum of $1.00 if an article consists of less than five pages. Please pay this fee to the Copyright Clearance Center, Inc., 21 Congress Street, Salem, MA 01970, USA, stating the ISSN 0001-6322, volume, and first and last page numbers of each article copied.

The copyright owner's consent does not extend to copying for general distribution, for promotion, for creating new works, or for resale. Specific written permission must be obtained from the publisher for such copying.

Authors of this journal can benefit from library and photocopy fees collected by VG WORT if certain conditions are met. If an author lives in the Federal Republic of Germany or in West Berlin it is recommended that he contact Verwertungsgesellschaft WORT, Abteilung Wissenschaft, Goethestraße 49, D-8000 München 2, for detailed information.

Paediatric Pathology

Edited by **Colin L. Berry**, Professor of Morbid Anatomy, Institute of Pathology, The London Hospital Medical College

With contributions by R.H. Anderson, A.E. Becker, M.J. Becker, C.L. Brown, J.N. Cox, J.W. Keeling, B.D. Lake, P.A. Revell, R.A. Risdon, J.F. Smith, and M. Swash

1981. 673 figures. XI, 697 pages.
Cloth DM 170,–; approx. £40.50
ISBN 3-540-10507-7
Distribution rights for Japan: Maruzen Co, Ltd., Tokyo

The increased provision of facilities for neonatal and paediatric care in the last twenty-five years has been accompanied only in part by appropriate developments in pathology. Specialist pathologists are many fewer than paediatric departments and details of the advances in knowledge of the pathogenesis of diseases in childhood are not uniformly available. In many institutions, an individual with a special interest rather than a special training will be responsible for paediatric pathology, and it is to this group of histopathologists that this text is addressed. For this reason, **Paediatric Pathology** is not written as a comprehensive text and is not intended to act as a reference volume. Areas which may produce particular difficulties for the individual with little specialist knowledge of the very young are dealt with in more detail (e.g. the lung) and, in general, entities in which the histopathology does not differ greatly from the adult disease are considered briefly. An account of developmental processes is included where prenatal considerations are helpful in understanding a particular entity. A number of specialist topics which are known to trouble those who work in nonspecialist departments are described fully (diseases of the muscle) or provided with guides to investigation (metabolic diseases). The value of investigation and careful description of abnormalities of development is also emphasized.

Contents: Examination of the Fetus. – Placental and Abortion Pathology. – Congenital Malformations. – Cardiac Pathology. – Central Nervous System. – Gastrointestinal System. – Liver and Gallbladder. – Respiratory System. – Diseases of the Kidney and Lower Urinary Tract. – Diseases of Bones and Joints. – Muscle and Peripheral Nerve. – Spleen, Lymph Nodes and Immunoreactive Tissues. – Endocrine Pathology in Paediatrics. – Metabolic Disorders: General Considerations. – Embryonic Tumours of Children. – Sudden Infant Death Syndrome and Nonaccidental Injury. – Subject Index.
